ALEXANDER AI INTEGRATED SOLUTIONS

Sweet Spot Custom Cakes

AI-Powered Bakery Management System

Prepared For: Sweet Spot Custom Cakes **Date:** May 2026 **Valid Through:** June 15, 2026 **Prepared By:** Jay Alexander

---

⚠ The Challenge

Running a custom cake bakery means juggling orders, tracking inventory, managing staff, and answering the same customer questions — all while actually baking. Most bakeries are still using notebooks, spreadsheets, or generic tools not built for them. Every hour spent on admin is an hour not spent on your craft.

The Solution

A custom-built, AI-powered bakery management platform designed specifically for Sweet Spot Custom Cakes — already built, already live, and ready for your team today. One platform handles everything: orders, inventory, staff, customers, marketing, and a 24/7 AI assistant.

What's Included — Core Features

Cakely — AI Bakery Assistant

Your 24/7 AI assistant trained on your menu, pricing, and offerings. Answers customer questions instantly — flavors, sizing, custom requests — day or night. Never puts a customer on hold.

Order Management

Create, track, and manage all custom orders in one place. Full status tracking from pending to picked up. Customer info stored and searchable. Refunds handled in-app. Never lose an order detail again.

Online & Tablet Kiosk Ordering

Beautiful public order form customers can access from any device. Plus a touch-screen kiosk mode for in-store iPads — cakes, drinks, treats, add-ons, and checkout all in one elegant flow.

Kitchen & Prep Management

Live kitchen view with today's orders queued. Auto-generated prep sheets and decoration tickets tell bakers exactly what to make and how. Equipment tracking ensures the right tools are ready.

Inventory & Suppliers

Track ingredients and supplies in real time. Low stock alerts so you never run short mid-week. Supplier management and automatic purchase orders mean restocking is nearly hands-free.

Customers & VIP Loyalty Club

Full customer profiles with order history. VIP Loyalty program with points, exclusive specials, and birthday offers. Birthday campaign tracking — your highest-converting marketing moment.

Marketing & Campaigns

Create targeted email campaigns to all customers, VIP members, or birthday customers. AI writes the ad copy for you. Holiday promos, flash sales, new item launches — all from one place.

Staff, Timesheets & Payroll

PIN-based staff login — no passwords to forget. Track time, manage timesheets, and run payroll from the same system. Activity logs keep everyone accountable.

Price Matrix

Set your cake sizes, flavors, and add-on prices once — they apply automatically everywhere: the online order form, tablet kiosk, menu, and public catalog. No more pricing inconsistencies.

Reports & Business Intelligence

Order history, revenue trends, busiest days, and most popular items. Real data to help you plan staffing, inventory, and promotions smarter. Expense tracking included.

Pickup Scheduling

Today's pickups at a glance. Upcoming order calendar. No more sticky notes, missed pickups, or surprise same-day orders. Everything organized, always visible.

Square POS Integration

Connect your existing Square account for seamless payment processing. Transactions flow directly into your orders and reports — no manual entry, no double bookkeeping.

Full Platform — Every Module Included

Your subscription includes access to the entire platform — not a stripped-down version. Every module below is live, fully built, and available from day one.

ORDERS & PRODUCTION

- ✓ Order creation & management
- ✓ Order status tracking
- ✓ Order detail view
- ✓ Refunds & adjustments
